Your child's job in Preschool is to play. The classroom is set up by centers so that the children can have opportunities to grow in four areas of development Social Emotional, Physical, Cognitive and Language. These centers are designed for the children's interest areas and provide opportunities for discovery in math, science, social studies, reading, writing, language development, and social interaction with peers. The teachers will be here to guide, and insure the health, safety and well being of every child. We will be making observations on the children that will provide us information on where their strengths and weaknesses are. We make this promise to you and your child; we will build on their strengths and nurture their weaknesses. We would like you as parents to be apart of the classroom and your child's education we invite you to come in anytime and spend time with the children and share your strengths with them. Please feel free to call or email Phyllis or myself if you have questions, concerns, or just need to chat about your child's day.

We will be providing you with a schedule for swim and gym time at the wellness center and will let you know ahead of time when swim suits and towels need to be brought in.

Peace and Blessings,

Nancy and Phyllis
