REFERENCE:

Dear Interested Party:

In late 2005 through early 2006, the Coeur d'Alene Tribe Water Resource Program requested public comments regarding its proposed Water Quality Standards for Approved waters of the Coeur d'Alene Tribe. In response to the public comment opportunity the Water Resource Program received over 300 individual comments. Each comment was carefully considered and responded to where appropriate. Based on the comments received, the Water Resource Program has revised its Water Quality Standards for Approved Waters of the Coeur d'Alene Tribe and submitted them to EPA for Federal Review and Approval. The Water Resource Program appreciates the input it received during this process. Response to comments and an updated version of the Coeur d'Alene Tribe Water Quality Standards for Approved Waters can be found at:

<http://www.cdatribe-nsn.gov/Departments/PublicNotices.aspx>

Thank you for your input into this process

Sincerely,

A handwritten signature in blue ink that reads "Scott Fields".

Scott Fields

Water Resource Program Manager
Coeur d'Alene Tribe
