

COEUR D'ALENE TRIBE

RESEARCH PERMIT APPLICATION

Introduction:

Research is the pursuit of knowledge, and is a sacred undertaking. Thus, it is the Coeur d'Alene Tribe's expectation that research conducted within our homeland is done so with **respect** for all members of our community, including people, plants, animals, water and land; that it is done with **reciprocity**, understanding its benefits to both the researcher and our community; that the researcher does so through **relationship** in our community that embraces and upholds the five pillars; and that the researcher carries the **responsibility** of ensuring that his or her research is conducted in an ethical way **that benefits the Coeur d'Alene people.**

For researchers conducting research on the Coeur d'Alene Reservation, it is essential to understand the beliefs and vision of the Coeur d'Alene Tribal Community. Since time immemorial, the Coeur d'Alene Tribe has been guided by its core values, articulated today in the Tribe's Five Pillars:

t'u'lschint: (Membership:) Capable, decent, moral, 'a good person', a good citizen in your family, tribal, local and world community. A responsible, accountable and informed citizen in all spheres of relationship. t'u'lschint can be translated as, 'capable, decent, moral, a good person.'

Snmiypnqwiln (Scholarship): Life-long, holistic learning with ideas rooted in tribal values, self-determination, self-government and sovereignty that produces deep knowledge to understand the world and meaningful application within the community.

'ats' qhnt' wesh (Stewardship): To care for all things with integrity, responsibility, accountability and social awareness in all spheres of life, human, animals, natural resources, and the cosmos, looking at each other from the heart.

hngwa' yqn; hnshat' qn (Guardianship): To protect our tribal ways of knowing and being through the protection, care and responsibility for our people, natural resources, culture, history, traditions, language and spirituality.

chsnpa'silgwesn (Spirituality): Faith from which the Creator reveals the connection between all life. It unites the space between the past, present, and future through the peoples, environment, and land; and is rooted within the ceremonies from which the Tribe celebrates those connections.
